

ANALYTIC STRESS

Safety

It is the policy of Analytic Stress to utilize a planned team effort toward the objective of preventing injuries and occupational illnesses of its employees and contractors, to protect its property from damage and loss and to provide for the safety and health of the general public in association with company operations. Therefore, all work shall be done in a safe manner, incorporating good safety practices and procedures, that will comply with all applicable domestic and international laws.

Analytic Stress bases its occupational safety and health efforts on the following:

- All injuries can be prevented.
- Management is responsible for creating the conditions which will prevent injuries.
- All employees and contractors are ultimately responsible for their own personal safety.
- Working safety is a condition of employment for company employees and contractors.
- All operating exposures can be safeguarded.
- Training employees and contractors to work safely is essential.
- Prevention of personal injuries is good business.
